Legacy ER

September 8, 2009

To Whom It May Concern:

I met Mark Pittman when we were trying to find a medical broker to locate a land tract to build our new 6,000 square foot ER and Urgent Care center. Not only was Mark able to find a land tract that wasn't even on the market at the time, but he also negotiated the transaction smoothly for us and helped guide us through the development process.

We had a few hiccups in the process with another group Mark was working with at the time. I cannot count the number of times that Mark kept the deal from going sour. He has integrity and a straightforward style that I found refreshing in the building and broker arena. Went I was frustrated with other's actions, I would call Mark, day or night, and he would fix the problem and was always coming up with a win-win solution.

Mark Pittman truly understands what customer service really is all about. I would highly recommend him if you are looking to buy or build a new building. If you would like to contact me personally to inquire about Mark, I would be happy to hear from you. Moving into new medical space is an exciting process—with Mark Pittman on your side you will feel that much more confidant.

Good luck!
